

## Model: 02634ZM

### UHF 430 - 530MHz Unity Gain Broad Band Heavy Duty GPI Antenna

The 02634ZM antenna is a rugged ground independent antenna for use in extreme environments. It is constructed with a solid matching section base, and a rugged flexible stainless steel wire cable radiating section.

The wide bandwidth is ideally suited to coverage across many operating bands.

This antenna is ground independent and will operate on both metal and non metal surfaces.

It is ideally suited to the mining industry or other severe environments, where damage to conventional antennas is prevalent.
